Mockup Review Notes

- I like the color scheme for mockup A, giving me a great 2000s energy. However, I think it might be a little bit hard to read. There's this great website that generates color combos that is both fun and accessible, AA compliant. (https://www.randoma11y.com/). You should check it out.

- Also I think the mockup looks a quite bit text-heavy. I think adding a few pictures, whether it is related to the topic or not, would be a good break for the viewer's eyes.

- Here are some inspo that I found that might be interesting to pull from.
